

Release Notes

Teamstudio Export 3.0.0

Teamstudio Export 3.0.0 is a feature update to Export. The major new feature is the addition of a preview tab to the HTML output that displays a preview of the document as it would look in the Notes client. Other enhancements include

- Ability to specify a separate drive for temporary files during archiving
- URLs in rich text will be converted automatically into active links

Additionally, there are a number of fixes and enhancements to improve robustness and enhance HTML rendering.

Please refer to [Installing Teamstudio Export](#) for details on system requirements and installation. This page will be updated with any known issues and fixes as they become available.

Fix List

Export 3.0.0

[TMS-1248] - View category text truncated in HTML
[TMS-1251] - Allow Configuration of where "Temp" files will be created
[TMS-1253] - Documents with no form field should export to HTML with the default form
[TMS-1254] - Support the caption attribute on attachmentref elements
[TMS-1255] - Full Wildcard timedates cause 'the value string includes a negative value' error
[TMS-1257] - Links in plain text should be converted to HTML links in the HTML output
[TMS-1258] - Occasional 'Invalid Arguments' error during archive even after TMS-1230 fix
[TMS-1259] - About dialog shows copyright 2018
[TMS-1261] - Fix Value cannot be null. Parameter Name: path2 error exporting to HTML

Export 2.2.0

[TMS-1197] - Extra Carriage Return in DB Title Causes Export to Crash
[TMS-1202] - Column Values Misaligned and/or Trimmed in HTML Viewer
[TMS-1203] - Tables with cells containing lists don't export to HTML correctly
[TMS-1205] - Views with many columns not displaying properly in HTML
[TMS-1207] - Lists immediately before tables don't export cleanly to HTML
[TMS-1212] - 'Profile document enumeration pool is full' error on large databases
[TMS-1214] - Paragraphs with a mix of text and <run> elements don't export correctly
[TMS-1216] - Invalid dates cause HTML export to fail
[TMS-1224] - Widen the time window when DXLExporter can resume from crashes.
[TMS-1226] - Ensure DXLExporter returns 0 on success
[TMS-1227] - Add logging to make sure the pipe monitor thread isn't crashing
[TMS-1228] - Errors in DXLExportNote can leave partial documents
[TMS-1229] - Text colors in rich text are not respected in HTML output
[TMS-1230] - Add workaround for occasional 'Invalid Arguments' archive warning
[TMS-1231] - Non-ASCII characters show as entities in the browser in view titles and column titles
[TMS-1232] - Full text search doesn't find matches with accents in rich text
[TMS-1233] - Full text search doesn't highlight matches containing accents
[TMS-1234] - Add more error reporting when a refresh fails
[TMS-1235] - Add alt text to images
[TMS-1239] - Add more diagnostic logging to DXLExporter, and UI to enable
[TMS-1241] - HTML exported attachments don't always get a correct file extension when there are more than one with the same filename
[TMS-1242] - We don't support embedded objects in HTML so no need to write out the chunks as attachments
[TMS-1243] - Archiving can terminate prematurely with no error in the log
[TMS-1244] - Design Elements Causing Error "Field In Note Has Wrong Datatype"
[TMS-1245] - Embedded carriage returns in text fields don't export to HTML
[TMS-1246] - Installer signature expires May 2019

Export 2.1.0

[TMS-1178] - Attachments with invalid characters in their file names cause the export to fail
[TMS-1181] - Attachments with very long file names can cause export to fail
[TMS-1184] - Invalid characters in view data can cause export to fail
[TMS-1189] - Attachments that aren't in rich text don't show up in HTML output
[TMS-1191] - 0 byte attachments can cause HTML export to fail
[TMS-1193] - Error messages from DXL Exporter are corrupted in the Export UI on non-US machines
[TMS-1194] - Sharepoint requires an aspx index page and no more than 5000 files per folder
[TMS-1196] - The DXLExporter version number should be visible in the Export About dialog.

Export 2.0.0

[TMS-1153] - Multi-select in list of Notes databases
[TMS-1156] - Support for filtering and ordering fields
[TMS-1160] - HTML documents should have their form name set on the top-level json object
[TMS-1162] - Regular doclinks are not visible in the HTML output
[TMS-1163] - We should clear existing HTML content before exporting
[TMS-1164] - Allow searching in the main window's list of databases
[TMS-1165] - Refreshing the UI is slow
[TMS-1166] - Support for doclinks in external databases
[TMS-1168] - The 'document' count in the HTML list of views is actually a count of rows, not documents
[TMS-1170] - Improve the error message when the notes.ini location is invalid
[TMS-1171] - Add demo mode that limits archiving to the first 10 entries in each view
[TMS-1172] - Write a default static viewer config file in the config directory if one does not already exist
[TMS-1173] - Tab characters in attachment filenames cause 'Illegal characters in path' error during export
[TMS-1174] - Line breaks in rich text are in the wrong place when exported to HTML
[TMS-1175] - Not possible to view the bottom of rich text fields that are taller than the screen
[TMS-1176] - Some attachment names generate bad links in the HTML export
[TMS-1177] - Support for filtering views

Export 1.0.2

[TMS-1149] - @Error values in numeric fields cause FormatExceptions in HTML export
[TMS-1150] - Documents that fail during archive cause HTML export to fail with missing root element
[TMS-1155] - UI is left in an inconsistent state if refresh fails owing to, e.g. an unavailable server
[TMS-1157] - Crash viewing HTML if files have been moved or renamed
[TMS-1158] - HTML Archive Viewer shows largely blank page with Internet Explorer
[TMS-1159] - Crash during archive if a template has never been opened

Export 1.0.1

[TMS-1141] - Profile documents not included in archive
[TMS-1142] - HTML documents with highlighting display *SafeValue must use [property]=binding*
[TMS-1143] - HTML document highlighting displays rich text as html if the search text matches part of a tag name
[TMS-1144] - HTML view filtering stops working if you navigate away from a view and then back
[TMS-1145] - HTML documents should not filter out fields that don't match the search term
[TMS-1146] - Database ACL not included in archive
